GOVERNMENT OF NEWFOUNDLAND.

By the Royal Proclamation of the 7th of October, 1763, this province is bounded on the East by the River St. John, and from thence, by a Line drawn from the head of that river, through Lake St. John, to the fourth end of Lake Nipissing; from whence the said Line, crossing the river St. Laurence and Lake Champlain, in the 45th parallel north, passes along the high land between the said Lake Champlain and Lake Ontario, and crosses the said Lake Ontario, and also along the north coast of the Baye des Chaleurs, and the coast of the Gulf of St. Lawrence, to Cape Rofiers, and from thence crossing the mouth of the river St. Laurence, by the west end of the island of Anticosti, terminates at the storehead near St. John. An Act of Parliament, passed in 1774, has removed the northern and western limits of this Province to the north-west angle of the said Lake Ontario, and the said limits are now, in New York, the western line of Pennsylvania, the Ohio, the Mississippi, and the southern boundaries of Hudson's Bay Company.—The *Town* of note are Quebec, Montreal, and Trois Rivieres. Quebec, which is a city and the capital of the whole province, is a fortified place, situated on the banks of the river St. Laurence, about 20 leagues above the mouth of the same river. It contains upwards of 8000 inhabitants.—Montreal is built on a fruitful island of the same name, in the river St. Laurence, 60 leagues fourth-end of Quebec; it is also divided into an Upper and Lower Town, well-built, and populous. Near Montreal, on the river St. Laurence, there are two other considerable towns, viz., Sorel and Richelieu, are two forts, Chabry and Beauport, and several smaller ones. The country round about the said town of St. Laurence is much frequented by several nations of Indians, for the purpose of trading; and there is a very good foundery in its neighbourhood.—*Lakes*:—The five principal, which communicate with the sea, are Lake Superior, 300 leagues in circuit; the Lakes Ontario, Erie or Oswego, Huron, and Michigan; all of them being a vessel of any size, may pass up and down the same. There are besides many others, as Lac Huron, Lac de la Plaque, Lac du Tonnerre, &c. The falls of Niagara. The stream is about a mile wide, divided by a rocky island in the form of a half-moon. The perpendicular height is 148 feet; and the noise may be heard upwards of fifteen miles.—The *chief River* is that of St. Laurence, navigable from the sea to Montreal; it receives the rivers Ottawa, Sagoy, and Richelieu, and the small Lake Ontario, which is the most remarkable Cape of the Province of Quebec, and of the Gulf of St. Laurence.

Rye.—Shipps of 500 tons may come up to the wharf of the city, and be always full, and the Hudson River has a hundred such vessels. The city is situated on a point of land between two large bays, and is a fine prospect of waters, the Jerseys, Long and Staten Islands, &c. and contains near 3000 houses, divided into seven wards, and above 12,000 inhabitants. It is Broadway-trire most of the houses have a row of trees along the street, and the water is so pure, that it is fit to drink. The water from fountains at a considerable distance from the town. Several islands belong to the Province of New-York; the two principal are *Long Island* and *Staten Island*; the first lies in length from East to West about 120 miles, and at a medium breadth 15; being 60 miles long, and 10 wide. Queensborough is the largest town on the north end of Long Island, which makes one county, lies to the west of Long Island. Amongst the fortresses of the province, Ticonderoga on Lake George, and Crown Point at the extremity of Lake Champlain, now in the hands of the Provincials.—*Cape* in New-York are, May, Sandy-Hook, and Monnock Points.—*Strait*: the Narrows and Hell-Gate through the latter, ships can easily pass according to account, the difference rapidity of the oceanic currents; for if a vessel gets into any but the right one, it is inevitably runs on a shoal of rocks on one side, or is whirled round and swallowed up by a dreadful vortex on the other.—*Rivers*: Hudon's or the North River (which runs through the city) and the Hudson River, which empties into the Bay of New-York, and the Mohawk, which flows into the Hudson, whose perpendicular height is 70 feet.

NEW JERSEY, DIVIDED INTO EAST AND WEST

It bounded on the N. by York, E. Atlantic Ocean, W. and S.W. CAROLINA, DIVIDED INTO NORTH AND SOUTH

[illegible]

G E O R G I A.

It is bounded on the E. and S. E. by the Savannah River, which divides it from South Carolina by the Atlantic, on the S. by the St. Mary's River; on the W. by the Creek Indians; and on the N. by the Cherokees. It is not very divided into counties. Its chief town is Savannah, about 12 miles from the sea, upon the large river of the same name, navigable for boats 200 miles further to the second town Augusta, which stands upon a most fertile spot, and is very commodiously situated for the Indian trade. Between those two places, and on the same river, are the towns of Milledgeville and Columbus. The latter of America is built in one of the islands which divide the Eastern coast, and whose numerous channels are very favourable to the navigation of small vessels. — *The River, of Georgia*, (besides the Savannah already mentioned), are the Little Hoggochee, Great Hoggochee, Altamaha, Great Stilla, &c. all navigable for boats a great way in the country.

FLORIDA, DIVIDED INTO EAST AND WEST.

By the Royal Proclamation of 1763, the following boundaries are annexed to those provinces: viz. EAST FLORIDA is bounded to the Westward by the Gulf of Mexico and the Apalachicola River; to the Northward, by a Line drawn from the mouth of the said River where the Chattahoochee and Flint Rivers meet, to the source of St. Mary's River, and thence by the course of the said river to its mouth; to the Eastward, by the Atlantic Ocean; and to the South, by the Gulf of Florida, including all islands within five leagues of the sea-coast. St. Augustine, the chief town, is situated upon the Eastern shore, and contains about 900 houses, mostly uninhabited. The River St. John, the principal branch of the said River, rises at the distance of 18 miles from the mouth of the said River, and runs N. E. & S. W. nearly as far down, for 200 miles. WEST FLORIDA is bounded to the Southward by the Gulf of Mexico, including all the islands within five leagues of the coast from the River Apalachicola to Lake Pontchartrain; so the Westward, by the Gulf of Mexico, including all the islands within five leagues of the coast from Lake Pontchartrain to the Mouth of the Mississippi which lies in 31 degrees North latitude, to the confluence of the Rivers Flint and Chatahochee into the Apalachicola; and to the Eastward, by the said Apalachicola River. The chief town is Pensacola, built on the West side of the Bay of the same name, and is one of the best harbours in this country. It is distant 100 miles to the West of Pensacola is the great Bay Mobile, with several French settlements.
